

NATURE FOR HEALTH

Elan[®]C12

Supports the immune system

Elan[®]C12 contains 1-monolaurin of lauric acid, naturally occurring in mother's milk, and a derivative from coconut oil. These ingredients are selected for the direct anti-pathogenic activity and a better protection of the immune system. This results in a higher defense mechanism of the animal against pathogenic challenges, an efficient villi protection and development. Thereby lowering the necessity of using antibiotics.

“Elan[®]C12 is lowering the necessity of using antibiotics.”
