

NATURE FOR HEALTH

Elan[®] Digest

Maximizes fat utilization

Elan[®]Digest is a powerful emulsifier specially developed to improve the digestibility of fat, as it contains an optimized combination of natural emulsifiers. The digestive tract is an aqueous environment and fats and oils are lipophilic substances that must be emulsified before being digested. The active ingredients in Elan[®]Digest improve the emulsification process of fats and micelle formation to, support the young animal as they are not able to produce enough bile acids for efficient emulsification to promote optimal digestion and growth. Because bile acids production is not optimal yet in young animals, Elan[®]Digest can support to optimize fat digestion in the start phase.
